IEG PI NOTICE

No. 13-77

TITLE/SIGNIFICANCE:

Possible SLBM- or SSM-Associated Railcar

COMMENT: A possible SLBM- or SSM-associated railcar has been identified at three locations in China. It has been seen consistently at Pei-ching Guided Missile Plant, Nan-yuan and on several occasions at Chin-hsi SSM R&D Test Complex. It was most recently identified at Kun-ming RR Transloading Yards South.

and the roof is divided into three equal parts by two dark lines. When seen at Kun-ming, the car was coupled with a 20-meter-long flatcar which was carrying a large mobile crane
